

# AUDIX INSIGHTS™

EXPERIENCE  
**VISIBILITY.**

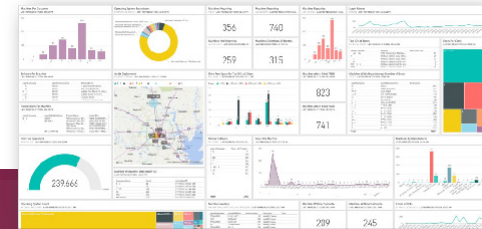

## You can't manage what you don't measure.

Our **Audix Insights™** solution is an IT infrastructure data mining and visualization tool which helps organizations discover valuable data insights about their IT environment. Such insights include asset discovery, global disk capacity and usage, asset health, warranty status for selected vendors and trend performance discovery.

### Comprehensive Support

We recognize that your IT infrastructure is a critical component of your business and **Audix Insights™** empowers you to keep informed about the state and condition of your IT infrastructure. **Audix Insights™** provides you with the visibility necessary to more productively support your environment. In addition, through the tool's features, you will be able to identify most hardware problems before they begin!

In addition, **Audix Insights™** provides you proactive issue intelligence and the financial state of your IT infrastructure. This is accomplished by gathering IT asset information and correlating it with financial information. Your business will not miss a beat! Let's talk.

## Audix Insights™

Asset  
Management

Security

Financial  
Information

Asset  
Intelligence
